2021 Preventive Services Reference Guide for Members

In accordance with the Patient Protection and Affordable Care Act of 2010 (PPACA), many preventive services, including screening tests and immunizations, are covered by UPMC Health Plan at no cost to you. Below is a list of services that should be covered without a copayment or coinsurance and without the need to meet your deductible as long as the services are delivered by a network provider and in compliance with the terms of the preventive recommendation. Please be aware that this list may be amended from time to time to comply with federal requirements. A complete listing of recommendations and guidelines can always be found at www.healthcare.gov/coverage/preventive-care-benefits.

Please note, routine preventive exams may result in specific diagnoses from your doctor or the need for additional follow-up care. If you require follow-up care or if you're already being treated for a condition, injury, or illness, services related to such care, even if included on the list below, may not be considered preventive and may result in health care expenses, such as copayments and coinsurance. If you have any questions, call your Health Care Concierge team at **1-888-876-2756 (TTY: 711).**

Under some plans that are "grandfathered" under the Affordable Care Act, you may have to pay all or part of the cost of routine preventive services. Please refer to your specific Schedule of Benefits.

Covered Preventive Services for Adults (Ages 19 and older)

EXAMINATION AND COUNSELING

Clinical Indicator	Ages 19-29	Ages 30-39	Ages 40-49	Ages 50-64	Ages 65+
Blood pressure		An	nually as part of a physical or well-	visit	
Depression			Each visit as appropriate		
General physical exam			Annually		
Screen/Counsel/Refer for tobacco use, alcohol misuse, substance abuse, skin cancer, healthy diet, and intimate partner violence			Each visit as appropriate		
Sexually transmitted infection (STI) prevention counseling			Each visit for adults at high risk		
Weight loss to prevent obesity-related morbidity and mortality	Offer o	r refer adults with a body mass inde	x (BMI) of 30 or higher to intensiv	e, multicomponent behavioral inte	ventions

Clinical Indicator	Ages 19-29	Ages 30-39	Ages 40-49	Ages 50-64	Ages 65+				
Abdominal aortic aneurysm screening					One-time screening with ultrasonography in men ages 65 to 75 years who have smoked				
Anxiety screening		Screen	ning intervals based upon clinical ju	dgment					
Aspirin use for the prevention of cardiovascular disease (CVD) and colorectal cancer				Members ages 50-59 with a 10% or greater 10-year cardiovascular risk*					
Blood pressure monitoring	If blood pressure numbers are high, additional monitoring with home blood pressure monitoring outside of the doctor's office or clinic to confirm diagnosis of high blood pressure before starting treatment								
BRCA screening and counseling	One-time genetic assessment for n		story of breast, ovarian, tubal, or pe e genetic counseling and, if indicate		their doctor. Members with positive				
Breast cancer preventive medications		Risk-reducing medications, such		ase inhibitors, for members ages 35 yrisk for adverse medication effects*	rears or older who are at increased				
Breast cancer screening				Annually					
Cervical cancer screening	For members ages 21-29, screening every three years with cervical cytology alone			ith cervical cytology alone, every five with hrHPV testing in combination w	•				

Covered Preventive Services for Adults (Ages 19 and older) (cont'd)

Clinical Indicator	Ages 19-29	Ages 30-39	Ages 40-49	Ages 50-64	Ages 65+						
Chlamydia screening	Sexually active members ages 24 and younger		Members who	are at increased risk							
Cholesterol screening	Screening e	very five years for members age	e 20 and older; more frequently for t	hose at increased risk for cardiovascula	ar disease						
Colorectal cancer screening				at average risk of colorectal inflammatory bowel disease, p previous colorectal cancer, or a fa to a high risk of colorectal cancer. blood test, sigmoidoscopy, and corecommendation. Frequency of screprocedure. Bowel preparations prescriptions per year.* Contact	natic members ages 50-75 who are cancer and who do not have previous adenomatous polyp(s), mily history that predisposes them Screening procedures (fecal occult plonoscopy) are subject to provider deening depends upon recommended as for colonoscopy limited to two Member Services with additional estions.						
Contraception	U.S. Food and [Drug Administration-approved o	contraceptive methods, sterilization	procedures, and patient education and	d counseling*						
Diabetes mellitus, type 2			Screening for abnormal b	lood glucose for members ages 40-70	who are overweight or obese						
Diabetes mellitus, type 2 (after pregnancy)	Members with a negative initial post	partum screening test result sheesult, testing to confirm the dia	ould be rescreened at least every th	nd who have not previously been diagnoree years for a minimum of 10 years afterdless of the initial test. Repeat testing fartum regardless of the result.	ter pregnancy. For members with a						
Gonorrhea screening	Sexually active members ages 24 and younger		Members who	are at increased risk							
Fall prevention					Community-dwelling members ages 65 and older who are at increased risk for falls may receive exercise interventions to aid in fall prevention.						
Hepatitis B screening			Members who are at increased r	isk							
Hepatitis C virus infection screening				following clinical assessment and who er disease but who are at increased risl							
Human immunodeficiency virus (HIV) infection prevention	Preexpos	sure prophylaxis (PrEP) with eff	ective antiretroviral therapy for mer	nbers who are at high risk of HIV acqui	sition*						
Human immunodeficiency virus (HIV) screening		Members ages 15-65 and/o	r sexually active members who are	younger than 15 or older than 65							
Lung cancer screening			Members ages 55-80 who have a 30 pack-year smoking history a currently smoke or, members ages 55-80 who have a 30-pack ye smoking history but have quit within the past 15 years may receive annual lung cancer screening at a Center of Excellence.								
Osteoporosis screening			prevent osteoporotic fractures than 65 years who are at increas	porosis with bone density testing to in postmenopausal women younger sed risk of osteoporosis, as determined al risk assessment tool	One-time screening for osteoporosis with bone density testing to prevent osteoporotic fractures in women 65 years and older						

Covered Preventive Services for Adults (Ages 19 and older) (cont'd)

SCREENINGS

Clinical Indicator	Ages 19-29	Ages 30-39	Ages 40-49	Ages 50-64	Ages 65+						
Statin use for the prevention of cardiovascular disease (CVD)	Members ages 40-75 with no history of CVD, one or more CVD risk factors, and a calcul event risk of 10% or greater*										
Syphilis screening	Members who are at increased risk										
Tobacco cessation medications ¹	Up t	o 180 days of pharmacotherapy per	year for members age 18 and older w	ho smoke, as prescribed by your do	ctor*						
Tuberculosis screening			Members who are at increased risk								
Urinary incontinence Annually											

¹Pharmacotherapy approved by the U.S. Food and Drug Administration and identified as effective for treating tobacco dependence in nonpregnant adults; coverage includes several forms of generic nicotine replacement therapy (gum, lozenge, and transdermal patch), sustained-release bupropion, Nicotrol nasal spray, Nicotrol inhaler, and Chantix.

*Member must have pharmacy benefits through UPMC Health Plan. Prescription required. Preventive coverage of prescription drugs is limited to generics unless a medical exception is authorized or for certain contraceptive categories where generics are not available. Preventive coverage of contraception includes at least one medication or device in each of the U.S. Food and Drug Administration identified methods. Some devices are covered only under the medical benefit. For questions about preventive coverage of contraceptives or other prescription drugs, please contact our Health Care Concierge team at the number listed on the back of your member ID card.

PREVENTIVE SERVICES FOR PREGNANCIES

Clinical Indicator	Ages 19-29	Ages 30-39	Ages 40-49	Ages 50-64	Ages 65+								
Alcohol and tobacco use screening		Expanded (counseling and interventions for pregna	nt members									
Aspirin use for the prevention of preeclampsia		Pregnant members wh	no are at high risk for preeclampsia afte	r 12 weeks of gestation*									
Bacteriuria screening		Screening for asymptomatic bacteriuria using urine culture in pregnant members											
Breastfeeding	Comprehensi	Comprehensive support and counseling from trained providers as well as access to breastfeeding supplies for pregnant and nursing members											
Chlamydia & Gonorrhea Screening		Pregnant members ages 24 and younger or pregnant members 25 and older who are at increased risk											
Diabetes mellitus after pregnancy		Screening provided. See Covered Preventive Services for Adults for more information.											
Folic acid supplements (< 1 mg)		M	embers who are or may become pregna	ant*									
Gestational diabetes screening	Λ	Members 24 to 28 weeks pregnant ar	nd at first prenatal visit for those at high	risk of developing gestational diabete	S								
Hepatitis B virus infection screening		Screening	g for pregnant members at their first pr	enatal visit									
HIV screening			Screening for pregnant members										
Perinatal depression		Screen or refer members for depress	on counseling for all pregnant and post	partum (less than one year) members	3								
Preeclampsia screening		Screening in pregnant me	mbers with blood pressure measureme	ents throughout pregnancy									
Rh(D) incompatibility screening	So	creening for pregnant members at firs	st prenatal visit and follow-up testing fo	r pregnant members with increased ri	sk								
Syphilis screening	Early screening for pregnant members												

*Member must have pharmacy benefits through UPMC Health Plan. Prescription required. Preventive coverage of prescription drugs is limited to generics unless a medical exception is authorized or for certain contraceptive categories where generics are not available. Preventive coverage of contraception includes at least one medical benefit. For questions about preventive coverage of contraceptives or other prescription drugs, please contact our Health Care Concierge team at the number listed on the back of your member ID card.

Recommended Immunization Schedule for Adults

VACCINE ▼ AGE GROUP ►	19-26 years	27-49 years	50-64 years	≥ 65 years						
Haemophilus influenzae type b (Hib)		1 or 3 doses depe	nding on indication							
Hepatitis A		2 or 3 doses dep	ending on vaccine							
Hepatitis B		2 or 3 doses dep	ending on vaccine							
Human papillomavirus (HPV) (female and male)	2 or 3 doses depending on age at initial vaccination or condition	27 through 45 years								
Influenza* (flu shot)		1 dose annually								
Measles, mumps, rubella (MMR)*		1 or 2 doses depending on indication								
Meningococcal A, C, W, Y		1 or 2 doses depending on indication [†]								
Meningococcal B (MenB) [^]		1 or 2 doses deper	nding on indication^							
Pneumococcal 13-valent conjugate (PCV13)		1 dose	65 years and older							
Pneumococcal polysaccharide (PPSV23)		1 or 2 doses depending on indication		1 dose						
Tetanus, diphtheria, pertussis (Td/Tdap)	Subs	stitute Tdap for Td once, then boost with either	Tdap or Td every 10 years or as clinically ne	cessary						
Varicella (VAR)	2 doses (if born	in 1980 or later)	2	doses						
Zoster live (ZVL)			1	dose						
Zoster recombinant (RZV)			2	2 doses						
For all persons in this category who meet t documentation of vaccination or have no e vaccine recommended regardless of prior e	evidence of previous infection, zoster	Recommended if some other risk factor (e.g., on the basis of medical, occupation or other indication).		nmended ages for nonrisk groups that accine, subject to individual clinical						

†Special situations for MenACWY:

- Anatomical or functional asplenia (including sickle cell disease), HIV infection, persistent complement component deficiency, complement inhibitor (e.g., eculizumab, ravulizumab) use: 2-dose series MenACWY (Menactra, Menveo) at least eight weeks apart and revaccinate every five years if risk remains
- Travel in countries with hyperendemic or epidemic meningococcal disease, microbiologists routinely exposed to Neisseria meningitidis: 1 dose MenACWY (Menactra, Menveo) and revaccinate every 5 years if risk remains
- First-year college students who live in residential housing (if not previously vaccinated at age 16 years or older) and military recruits: 1 dose MenACWY (Menactra, Menveo)

^Shared clinical decision making for MenB:

• Adolescents and young adults ages 16 through 23 years (ages 16 through 18 years preferred) not at increased risk for meningococcal disease: Based on shared clinical decision making, 2-dose series MenB-4C at least one month apart, or 2-dose series MenB-FHbp at 0, 6 months (if dose 2 was administered less than six months after dose 1, administer dose 3 at least four months after dose 2); MenB-4C and MenB-FHbp are not interchangeable (use same product for all doses in series)

Special situations for MenB:

- Anatomical or functional asplenia (including sickle cell disease), persistent complement component deficiency, complement inhibitor (e.g., eculizumab, ravulizumab) use, microbiologists routinely exposed to Neisseria meningitidis: 2-dose primary series MenB-4C (Bexsero) at least one month apart, or 3-dose primary series MenB-FHbp (Trumenba) at 0, 1–2, 6 months (if dose 2 was administered at least six months after dose 1, dose 3 not needed); MenB-4C and MenB-FHbp are not interchangeable (use same product for all doses in series); 1 dose MenB booster one year after primary series and revaccinate every 2–3 years if risk remains
- Pregnancy: Delay MenB until after pregnancy unless at increased risk and vaccination benefits outweighs potential risks

Covered Preventive Services for Children

EXAMINATIONS

Samilara						Infancy						
Services	Birth to 1 mo	2-3 mo	4-5 mo	6-8 mo	9-11 mo	12 mo	15 mo	18 mo	24 mo	30 mo		
Anemia screening			*			×	×	×	×	*		
Autism screening								×	×			
Behavioral assessments	×	×	*	×	×	×	×	×	×	×
