

EQUIPPING THE NEXT GENERATION OF INNOVATORS

Patient Safety Fellowship

The Frontiers of AI & Tech to Enhance Health Care

ABOUT THE FELLOWSHIP

Are you interested in exploring artificial intelligence and cutting-edge technology to revolutionize safety in health care? We invite you to apply for the Patient Safety Fellowship hosted by the Jewish Healthcare Foundation. The 20th edition of the fellowship will explore the intersection of AI, safety science, and lessons from other industries to improve healthcare outcomes.

Fellows from interdisciplinary backgrounds and academic institutions will work together to discover how technological innovations can transform health care and prevent harm before it occurs. The fellowship offers an opportunity to learn from experts in the fields of health care, AI, manufacturing, tech and more. Fellows will form teams tasked with analyzing a specific care setting and proposing an application of AI to improve the safety of patients and workers. Each team will be matched with a mentor from a safety-conscious industry to help infuse their insights into health care. One team will be given the opportunity to travel to San Diego to share their insights at an AI and patient safety conference in November 2024.

As a Fellow, you will:

- ◆ Gain an understanding of the evolution of safety and how existing technologies such as AI can drive significant improvements to healthcare outcomes
- ◆ Participate in creative learning experiences that bridge the gap between AI, safety science, and health care
- ◆ Strengthen your resume with a Fellowship certificate highlighting your new skills

DATES & TIMES

Tuesdays from 4:30-7:00pm ET
June: 4, 11, 18, 25 July: 2, 9, 16*, 23, 30

*Virtual session

**Dinner is provided at in-person sessions.

WHERE*

In-Person at the EQT Plaza, 625 Liberty Avenue, Pittsburgh, PA 15222 and site visits around the Pittsburgh area.

*The virtual session on July 16 will be on Zoom

WHO SHOULD APPLY

Graduate students (including AI, health care, safety, computer science, engineering, etc), undergraduate students in safety science and health professions, and young professionals who are interested in AI, safety, health care innovation, and digital transformation.

TO APPLY

Please complete the online application, which requests a personal statement, resume, and letter of reference:
