

ResNet Quick Guide: Finding the MAC Address in Mobile OS's

Microsoft Windows Phone

Windows Phone 7.x/8.x:

- In the App list, tap **Settings** -> **About**, and tap **More info**

Apple iOS

iOS 4.x/5.x/6.x:

- On the home screen, open **Settings** -> **General** -> **About**
- The MAC address will be listed under "**Wi-Fi Address**".

Google Android

Android 2.x/3.x/4.x:

- From the home screen, open **Settings** -> **About phone** -> **Status**
- The MAC address will be listed under "**Wi-Fi MAC address**".

These settings will depend on what model and version of Android the phone is running. Manufacturers have their own menu layouts in their phones (e.g. the Motorola Droid Razr, the Samsung Galaxy S4).
