

# PASSION MEETS PURPOSE

## CALLING ALL FUTURE TEACHERS!

Teaching has evolved from traditional lectures to dynamic, student-centered learning environments where technology, collaboration, and creativity play a key role. You can be part of this exciting transformation. RMU to YOU is great way to learn exactly how the field is changing, where graduates work, what they do, and why it matters.

The Best Part is RMU Comes To You! We will bring current students, faculty, & working professionals straight to your classroom!

is that RMU  
Comes to You!

## DATA & DONUTS

Curious what the fields of Data Science and Actuarial Science are and what careers are associated with them?

RMU to YOU is a great way to learn exactly that. We will bring current students, faculty, working professionals, and DONUTS straight to your classroom for a career exploration in these two lucrative fields.

We will teach your students about the fields of Data Science and Actuarial Science and what they entail, the careers available in these areas, and the important roles that they play in today's constantly evolving society. Sessions are scheduled at your convenience.

# CHOOSE A CAREER IN CYBER SECURITY

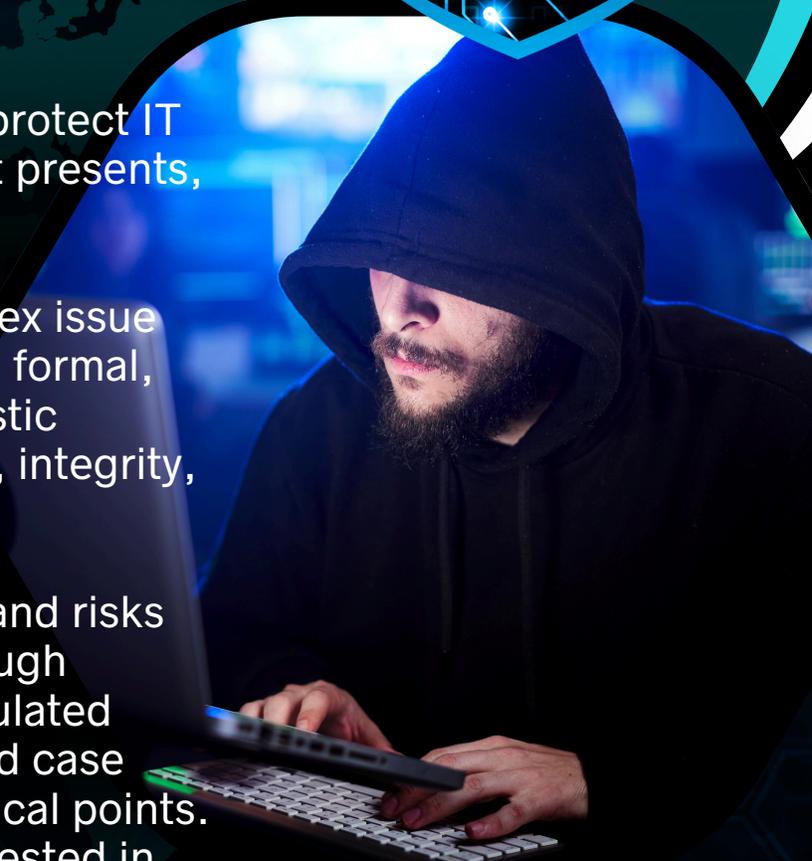

## Ethical Hacking & Cybersecurity: Impacts on Society

Students will learn how hacking tools protect IT infrastructure, the ethical challenges it presents, and the potential societal impacts.

Cybersecurity is a multifaceted, complex issue that requires organizational, technical, formal, and informal controls to provide a holistic solution to protect data confidentiality, integrity, and availability.

Cyber courses examine opportunities and risks posed by innovative technologies through extensive hands-on exercises in a simulated environment, real-life applications, and case studies with discussions to deliver critical points. These courses are ideal for those interested in cybersecurity careers.
